Cell: 303-929-7613

General Comments...

We provide most of the needed backline such as Turntable, Needles, DJ Mixer and CDJs. If you have everything below ready, we can be set-up and ready to play in as little as 15 minutes. Do let us know when you would like us to arrive at the venue for set-up and sound check. We do a short bible-study and prayer time before each event and you are more than welcome to join us. Thank you for the opportunity to come perform and minister at your event!

Please Provide...

Technical items

- Direct Input Box
- XLR or Quarter Inch Cord to run from the Direct Input Box to the DJ's mixer
- 1 Microphone with XLR cord. Microphone will run through our mixer.

DJ Table

- A sturdy and stable rectangle table at least 6-feet long . We use vinyl records and an unsecure table can make the needles bounce and skip the record. The most optimal situation, but not necessary is 16 Cinderblocks (8 on each side) with a wood board across them. The Cinderblocks help to absorb vibration. Please also provide a skirt for the table or table cloth for aesthetic reasons

Monitors

- 2 Monitors placed on either side of the DJ table preferably at ear level. Powered Mackies are a good example. [LINK](#). Wedge monitors on the floor are fine but not optimal

Power Needs

- Power strip with at least 5 inputs
- Extension cord long enough to go from the DJ Table to an outlet

Miscellaneous

- 3 Chairs to put our records on. Any kind.
- Water (any temperature is fine)

Sound and Mixing

- Techno music is very bass heavy. For the best sound, please provide a sound system that can output a very heavy low-end
- We only need 1 channel on the sound mixer at flat levels with appropriate amplitude

Merchandise Table

- 6-foot rectangle table at least 6 feet long with skirting or table cloth with 2 electricity inputs.

Thank You!
